

Here is what you will need to build a frame for your mosquito net

1. 4 PVC Side Outlets 90° 3/4x 3/4x3/4 see attached picture
Home Depot sells a different type of 90 see attached picture

2. 2 PVC Regular Tees 3/4x3/4x3/4 See attached picture

3. 4 10 foot PVC 3/4 pipe you will have left over pipe

4. PVC cement

5. 4 3/4 In. x 1/2 In. PVC Schedule 40 Reducing Male Adapter MIPT x Slip if use home depot part see attached picture

The legs are 38 inches the width is 33 inches and the length is 72 inches Cut the 2 long pipes in half. Cut the rest of the pipe to length. Glue the 90's on to the legs also glue one of the tee's onto one of the pipes you just cut in half. Don't glue any other pieces next put it together making a rectangle shape (see attached photo). I would suggest that you number every end so you will know how it goes together. I hope this helps.

6. Mosquito netting from Scout Store or REI for about \$15.00

The frame should look like this when done
